RI TRANSPARENCY REPORT

2020

Harith General Partners

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2020 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

SG 07.2

For the roles for which you have RI oversight/accountability or implementation responsibilities, indicate how you execute these responsibilities.

The investment committee, on behalf of the Board, screens the investment paper which should conform to the investment policy as contained and supported by the SEMS policy. In that regard, the investment committee would interrogate the SEMS issues and ensure that the paper is compliant with the broader ESG covenants. The investment paper is then submitted to the Board after it has been approved by the investment committee, post the due diligence assessments. The Board and the investment committee provide regular quarterly oversight on the issues of portfolio performance where detailed matters including ESG issues are flagged and deliberated in detail.

Before the investment paper is submitted through to the investment committee, it is vetted by the CEO and CIO post its submission to the Harith Internal Reporting Investment Committee attended by all investment directors as well as investment analysts. The CEO and CIO discuss emergent ESG matters with the investment directors responsible for respective investee companies. Material risk issues are identified and followed through by the Audit and Risk committee, where the CEO and CIO communicates with the board sub committee regarding emergent ESG matters. The CEO and CIO also advises on the ESG implications on the portfolio and the risk mitigants adopted to ensure

portfolio performance is not adversely affected. In some instances, the CEO and CIO will address the matters with the investee companies directly.

However, this prerogative is usually the role of the investment director responsible for the respective investee company. The oversight role is attended to during investee Board meetings as well as relevant sub committees established to address specific matters affecting the relevant investee company.

The Investor Relations ensures that the organisation gathers and compiles accurate and qualitative information from investee and investment directors. The information is consolidated and disseminated regularly to investors and relevant stakeholders. This includes participation in oversight matters as requested and required by investors, especially the developmental finance institutions.
